Abstract

Abstract

1 Introduction

Your text

2 Instruction for Authors

An extended abstract or a full paper is required to be prepared in B5 (182mm x 257mm) paper size. Your abstract or paper should be converted into a PDF format. In an extended abstract or a full paper, every figure should appear as a grayscale image.

Technical Issues:

The LaTeX template above is prepared to use B5 paper size, however, many softwares set the default paper size of PDF to letter/A4 size. Please confirm that the electronic abstract/paper in a PDF format is also in B5 paper size, not in letter/A4 size. Further, you can check whether a PDF file has all its fonts embedded by opening the PDF, choosing menu item “File—Properties” to view the document properties, and selecting the “Fonts” tab. All the listed fonts should be marked as “Embedded” or “Embedded Subset.”

There are two recommended procedures to generate PDF file with B5 paper size:

1. dvips -D 600 -t B5 -Ppdf -G0 mypaper.dvi, and then
ps2pdf -dPDFSETTINGS=/printer -dCompatibilityLevel=1.3 -dMaxSubsetPct=100
-dSubsetFonts=true -dEmbedAllFonts=true -sPAPERSIZE=b5 mypaper.ps
2. dvipdfm(x) -p B5 mypaper.dvi

Do not use “pdflatex”: In general, pdflatex will only embed all fonts if you fix your pdflatex configuration (something that has not been done by default for all latex distributions).

2.1 sub-section
